Project Title : Roald Dahl Website

I'd like to build this site as multiple pages, with navigation bar on the left. There are plenty of content and photographs to build to individual pages. I would like it to have a museum feel.

• Main Page – top ranked books shown like a museum, (intro sections to sub pages)

• Sub Page1 – Roald Dahl's Early life, Post-war life

• Sub Page2 – Children's Fiction

       (list -> if click, details about the book shows up – 5 books)

       or

       (second sub navigation bar -> under Sub Page2 – 4 books, each in separate pages)

• Sub Page3 – Screenplays

· Sub Page4 – Influences & Legacy
